Specifications

A GINE NFT is an Ethereum ERC721 token <https://info.etherscan.com/what-is-erc721/> . A total of 11,111 Tokens will be minted for 0.0311 ETH, with 111 free WL tokens, and a programmatic rebate for every 11th NFT in the contract; resulting in a grand total population of 9,989 paid tokens yielding approximately 310.65 Ethereum.

Milestones

1. Develop and test software and smart contract; deploy to blockchain

Completed 24-Jan-2022

2. Generate sufficient following on twitter and discord; and Mint.

In an effort to ensure we mint out in our predicted 3 days, we will not start minting until we have a following of at least 5,000 on twitter and discord.

3. Fund the rebate and project wallets

As described in our roadmap we will fund both wallets proportionally to the amount minted.

RoadMap

Our roadmap is based on the minting of the NFTs which is the primary source of revenue for this project, although there is recurring revenue listed below as well to sustain the project.

9. **Community proposal submissions end** **10 days after mint-out.**
community members can no longer submit project proposals for the project wallet.
10. **Community proposals vote** **20 days after mint-out the votes will be tallied. This vote adheres to a strict no-whale policy, it is 1 vote per person (verified Discord user) of NFTs, whether they hold 1 or 10 tokens.**

Team

Not Fully Doxxed team: Our team is not fully doxxed due to real life commitments, risk management, and ability to operate freely. We came together from other projects, some rugged and some just not mooning. We thought about what is interesting, what is new, and what can go on for years. Meet us at any main NFT conference and we will show you our ID; after you show us yours.
